

## Skill Base

The Wakeman Harris team brings together highly qualified professionals from a range of backgrounds.

The combination of in-house experience allows us to undertake the role of CDM Co-ordinator on large and complex projects or ones with high or unusual risks.

Our staff are also able to advise on sustainability issues and prepare BREEAM assessments for your project.

### About us

Wakeman Harris is a division of Wakemans Limited and offers professional advice on an array of safety and sustainability issues.

### What we do

The company's services help to unlock health and safety information and current legislation, and disseminate it to professionals and trades involved in the Construction industry including Clients, Designers and Contractors. Moreover our professionals will make duty holders aware of and assist them in fulfilling their obligations under the current CDM Regulations.

Wakeman Harris' services are tailored to allow all parties to work as a cohesive team to achieve a safe and sustainable environment that benefits everyone.

### Services

Our professionals deliver a complete service that includes Health and Safety consultancy, CDM Co-ordination and sustainability services including EPC and BREEAM assessments.

### Wakeman Harris

Have the exact combination of experience and skill to achieve project safety and sustainability.
